Agricultural Statistics of India

1936-37

VOLUME II—INDIAN STATES

Introductory Note

THIS volume deals with statistics for Indian States as far as reported. General. As in the previous issues, summary tables have been inserted to show the total figures relating to area, the classification of area, and the area under crops for each State or group of States, and the totals for all the reporting States. The total number of cattle, as far as reported, in each of the years 1917-18 to 1936-37 has also been included in the general summary table (No. 1). These statistics are defective for comparative purposes, as additions have been made in the number of reporting States from time to time. Two charts and an index for easy reference have, as usual, been added to the volume.

It should be noted that, for the reasons explained in subsequent paragraphs, the agricultural statistics of Indian States are incomplete. They are also of far less accuracy than those of British Provinces published in Volume I. As these States comprise one-third of the total area of India, the importance of the statistics relating to them can scarcely be over-estimated.

The total area of Indian States is 459 million acres (718,000 square miles), with a population of 81 millions according to the Census of 1931. These States are divided, for purposes of agricultural statistics, into two main classes, namely, (1) States within the jurisdiction of Local Governments and Administrations, and (2) States having direct political relations with the Government of India.

(1) *States within the jurisdiction of Local Governments and Administrations.*—The total area of these States is 34,093,000 acres, with a population of 5 millions. They are divided into the following main groups:—

	Area Thousand acres	Population Thousands
Assam States	7,891	626
Bengal States†	3,478	973
North-West Frontier Province States (including Tribal areas)†	14,676	2,209
Punjab States †	3,387	438
United Provinces States †	4,661*	1,206
Total	34,093	5,452

The total area of all these States (with the exception of the Tribal areas in the North-West Frontier Province) is included in the areas of the respective British Provinces stated in column 2 of Table I of Volume I (British India), but is also shown separately in column 3 of that table in order to arrive at the net area of British territory (in column 5) dealt with in that volume. But the agricultural statistics dealt with in this volume relate only to the following

* Includes areas of certain States lying within the provincial boundary but which do not form part of United Provinces States, viz., Benares, Rampur and Tehri-Garhwal.

† These States have since been placed in direct Political relationship with the Crown Representative in India.

thirty-two States in the Punjab, and the United Provinces, for which alone information is available :—

	Area Thousand acres	Population Thousands
<i>Punjab States—</i>	57	28

(2) *States having direct political relations with the Government of India.*—
These are divided into the following main groups :—

	Area Thousand acres	Population Thousands
Baluchistan States	51,462	405
Baroda	5,105	2,443
Bombay States (including Western India States)	41,252	8,468

Total	249,914	53,690

The total area of all the seventy-six reporting States named above amounts to 257,326,000† acres with a population of 55 millions. These States, therefore, contain 56 per cent of the total area, and 68 per cent of the total population, of the Indian States.

The earliest years from which the statements of agricultural statistics have been received from these seventy-six reporting States are noted below :—

Mysore	1886-87
Jaipur	1892-93
Gwalior	1896-97
Bikaner, Marwar, Tonk	1898-92
Alwar, Bharatpur, Jhalawar, Kishangarh, Kotah	1900-01

Bilaspur§	1922-23
Orchha	1928-29

† The difference between this figure and the total area as shown in column 2, Table I on page 14 is due to the inclusion here of complete area figures for Barwani and Simla Hill States taken from the census returns.

‡ For some of the Simla Hill States statistics have been received much later than 1908-09.

§ Statistics for the State were formerly included under Simla Hill States.

(a) Since transferred to the Mysore Residency.

* Included in Punjab Hill States Agency.

The returns for the States mentioned below relate to the years ending on the dates shown against each :—

Table I,
Total area.

From the total area of all the seventy-six reporting States (257,326,000 acres*), deduction must be made of 109,936,000 acres, comprising chiefly unsurveyed areas and lands held on jagir, muafi, and other privileged tenures, for which statistics are not available. The net area actually covered by these statistics is, therefore, only 147,390,000 acres by professional survey†, or 147,125,000 acres according to village papers‡.

Table II,
Classification of area.

	Thousand acres	Per cent	shown in the margin as far as details are available‡. Forests occupy 18,678,000 acres, or 12·7 per cent of the total, while the area not available for cultivation, that is, land absolutely barren, or uncultur- able, or covered by build- ings, water, and roads, or otherwise appropriated to uses
Forests	18,678	12·7	
Not available for cultivation	27,557	18·8	
Culturable waste other than fallow	18,715	12·7	
Current fallows	12,699	8·6	
Net area sown	69,427	47·2	
Total	147,076	100	

other than agriculture, amounts to 27,557,000 acres, or 18·8 per cent. The balance, 100,841,000 acres, or 68·5 per cent represents the area available for cultivation. Of this area, 18,715,000 acres, or 12·7 per cent of the total area, represent culturable waste, i.e., land available for cultivation but not taken up, and 12,699,000 acres, or 8·6 per cent, fallow in the year under report. The net area actually sown in the year was thus 69,427,000 acres (47·2 per cent of the total area). This net area sown, however, excludes areas sown more than once in the year. If areas sown more than once (as noted below) are taken as separate area for each crop, the gross area sown in the year of report amounts to 73,060,000 acres.

Table III,
Area under irrigation.

The total area irrigated in the reporting States during 1936-37 was 10,349,000 acres, as against 10,025,000 acres in the preceding year. Of this, 3,616,000 acres were irrigated from Government canals, 1,082,000 acres from private canals, 1,885,000 acres from tanks, 2,799,000 acres from wells, and 967,000 acres from other sources of irrigation. These figures, however, do not take into account areas sown more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. If areas sown more than once are counted as separate area for each crop, the gross area of irrigated crops amounts to 11,401,000 acres, of which 9,031,000 acres are reported to have been under food crops.

* The difference between this figure and the total area as shown in column 2, Table I on page 14 is due to the inclusion here of complete area figures for Barwani and Simla Hill States.

† For explanation of the terms "professional survey" and "village papers", see footnotes to Table I (page 8) of this volume and the Note prefixed to Volume I.

‡ Vide footnote (f) on page 31.

The gross area cultivated with crops in the reporting States was, as stated Table IV, above, 73 million acres in 1936-37. The Area under crops.

	Thousand acres	Per cent of total
Food-grains	49,787	68·8

crops, oilseeds occupied 7,097,000 acres, or 9·8 per cent of the total area sown, fibres such as cotton, hemp, etc., 7,323,000 acres, or 10·1 per cent, and fodder crops 3,117,000 acres or 4·3 per cent. The other non-food crops, namely, dyes and tanning materials, drugs and narcotics (tobacco, tea, coffee, opium, etc.) and miscellaneous non-food crops together covered about 1,757,000 acres, or 2·4 per cent of the total.

The total extent of land on which more than one crop was raised during the year was 3,633,000 acres.

Table V is returned by ninety-eight States, namely, Ajaigarh, Ali-Rajpur, Alwar, Aundh, Bahawalpur, Banganapalle, Banswara, Baoni, Baroda, Barwani, Benares, Bharatpur, Bhavnagar, Bhopal, Bijawar, Bikaner, Bilaspur, Bundi, Chamba, Charkhari, Chhatarpur, Cochin, Cutch, Datia, Dewas (Junior), Dewas (Senior), Dhar, Dharampur, Dholpur, Dhrangadhra, Dhrol, Dungarpur, Faridkot, Gondal, Gwalior, Hyderabad, Idar, Indore, Jafarabad, Jaipur, Jaisalmer, Jaora, Jath, Jhabua, Jhalawar, Jind, Jobat, Junagadh, Kapurthala, Karauli, Kashmir, Khairpur, Kishangarh, Kotah, Kushalgarh, Limbdi, Loharu, Maihar, Malerkotla, Mandi, Marwar, Morvi, Mysore, Nabha, Nagod, Narsingarh, Nawanagar, Orchha, Palanpur, Palitana, Panna, Partabgarh, Patiala, Phaltan, Piploda, Porbandar, Pudukkottai, Radhanpur, Rajgarh, Rajkot, Rampur, Rewa, Rutlam, Sachin, Sailana, Samthar, Sandur, Shahpura, Sirmoor, Sirohi, Sitamau, Tehri-Garhwal, Tonk, Travancore, Vijayanagar, Wadhwan, Wankaner and other Western India States. According to the latest statistics—(collected in most cases in connexion with the Fourth All-India Cattle Census held in 1935)—the total number of live-stock of the bovine class (bulls, bullocks, cows, buffaloes and young stock, i.e., calves and buffalo calves) was 52,741,000, of the ovine class (sheep and goats), 33,049,000 and of horses and ponies, mules, donkeys and camels, 1,748,000. The numbers of ploughs and carts were 6,315,000 and 2,008,000 respectively.

Table VI (Land Revenue) is prepared by thirty-four States, namely: Alwar, Aundh, Banganapalle, Barwani, Benares, Bharatpur, Bhopal, Bikaner, Bilaspur, Bundi, Cochin, Dharampur, Dholpur, Gwalior, Hyderabad, Indore, Jaipur, Jath, Jhalawar, Kashmir, Kotah, Marwar, Mysore, Nagod, Narsingarh, Orchha, Phaltan, Pudukkottai, Rajgarh, Rampur, Sachin, Sandur, Tehri-Garhwal and Tonk.

The Appendix explains the vernacular terms used in this volume, and the charts illustrate (1) the classification of the total area showing the proportion of cultivated and uncultivated lands, and (2) the total area sown in 1936-37 divided between food and non-food crops.

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in Southern India. In States where there has been no professional survey, the figures are based on the best available information.

Column 3.—In this column is deducted the entire area for which the statistics required for Tables II and IV are not forthcoming in whole or in part. This area comprises chiefly estates held on privileged tenures, which have not yet been surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develops, the area in this column is reduced, and that entered in the next columns (4 and 5) and dealt with in Tables II and IV is correspondingly increased.

Columns 4 and 5.—Column 4 is a check on the accuracy of column 5. In the latter, "village papers" mean "the papers prepared by the village accountants". In States where no village papers exist, or where the source of information is the same for both the survey and the village papers, the figures in column 4 are necessarily repeated in column 5. The area in village papers may differ somewhat from that given by the Survey Department, (a) because, while the survey area is calculated in block, the area by village papers represents the added total of field and village areas, and (b) because, the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads is not always uniform in the two sets of returns.

(a) Statistics are furnished by twenty-six States of this group, namely, Bashahr, Jubbah, Theog, Kumharsain, Khanoti, Baghal, Ghund, Mahlog, Baghat, Madhan, Koti, Keonthal, Bija, Dhani, Darkoti, Kutnar, Nalagarh, Bhajji, Kunihar, Rawainagarh, Balsan, Delath, Dhadi, Mangal, Ratash and Sangri. These represent over 98 per cent of the aggregate area of all the States comprised in the group. The returns, however, relate generally to the settled portions of the reporting States.

(b) Column 2.—As there has been no revenue survey so far, this column states the area of the State according to the best available information. Column 3 states the areas of jagir and munsif villages, the boundaries of which have been demarcated, but for which the statistics required for other tables are not available. Columns 4 and 5.—In the absence of any revenue survey data, the figures in column 5 are repeated in column 4.

*Increase due to inclusion of additional States comprised in the group.

Column 3 states the areas of jagir and such other villages as are still unsurveyed. It also includes the area of those khalsa villages which have not yet been regularly assessed; these are chiefly the latest acquisition to khalsa under the law of escheat.

Columns 1 and 5.—The area by village papers does not differ from the area by survey, for, although differences occur under the different classes of soil, the total area of each village is the same in both cases.

Column 2.—The definition of the term "forests" is as follows:—"Any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area sown), an explanation being given in a note.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the area sown. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

(a) Included under "culturable waste other than fallow".

 (a) Column 2 states the areas of forests left unassessed. Forests in this State not having been demarcated, figures in columns 3 and 4 also include some forest areas. Column 4 states culturable land not in possession of any cultivator. Column 5 states uncultivated land, i.e., *Bir* (grass lands) and pasture land in possession of cultivators for which they pay land revenue. It also includes the area thrown out of cultivation for three or more years.

Column 2 states the areas of State and district forests and of plantations.

Column 3 includes not only lands absolutely unfit for cultivation, but also lands reserved for pasture, and plantations intended for public use and therefore left unassessed. A large portion of the pasture lands is fit for cultivation, and is given out for cultivation from time to time under special orders, such lands when given out for cultivation being transferred from column 3 to 5 or 6 as the case may be.

Column 4 states unoccupied assessed waste.

Column 5.—There is no system of fallows, that is, lands are not systematically left uncultivated for the purpose of giving them rest. Individuals occupy large areas and pay full assessment thereon, leaving portions uncultivated, generally for the use of their cattle. For purposes of account the difference between the areas of the lands occupied by individuals and of those actually cultivated by them is taken as fallow. The lands occupied and assessed are sometimes unfit for cultivation, having been taken up on full assessment merely for use as pasture, but the exact area of all such lands cannot be ascertained, although it cannot be large.

Columns 2 to 7 state the area actually irrigated during the year, areas sown more than once being counted once only.
NOTE.—The variations in the areas shown in different years under the same crop in the same tract do not in all cases represent an actual increase or decrease in the area under that crop. In certain cases a revised classification or the correction of a faulty estimate is responsible for the change.

NOTE.—(i) In this table are entered the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by higher authorities.

(ii) The variations in the areas shown in different years under the same crop in the same tract do not in all cases represent an actual increase or decrease in the area under that crop. In certain cases a revised classification or the correction of a faulty estimate is responsible for the change.

(a) Included under "Cumbu or bajra".

NOTE.—(i) Animals in towns, cities, and cantonments as also those employed by Government Departments and by Municipalities have been included wherever it is possible to secure their enumeration. Oxen and buffaloes not old enough for work or to produce young ones are classed as "young stock". The statistics for 1929-30 and 1934-35 are, in most cases, those collected in connexion with the Third and the Fourth All-India Cattle Censuses, held during 1930 and 1935 respectively.

(ii) Further details of the 1935 Census may be had from the Report on the Cattle Census, 1935.

* Statistics for other tables are not available.
